

Amendments to the Claims:

The following listing of claims will replace all prior versions, and listings, of claims in the application:

1-12. (Canceled)

13. (Currently Amended) A holding apparatus for holding a vitreous body surgical contact lens on a patient's eyeball, comprising:

an eyelid opener portion having an upper portion that pulls and opens an upper eyelid and a lower portion that pulls and opens a lower eyelid;

a holding portion that holds the vitreous body surgical contact lens on the ~~eyeball~~eyeball, the holding portion located in an open space between the upper portion and the lower portion; and

a connecting portion that connects the holding portion and the eyelid opener portion, the connecting portion including an elastic member that extends across at least a portion of the open space so that a position of the holding portion relative to the eyelid opener portion and the eyeball is continuously adjustable during surgery without canceling a connection state of the eyelid opener portion and the holding portion;

wherein the connecting portion comprises a pair of elastic closed loop members for connecting the holding portion in a ~~semi-fixed~~adjustable state, the holding portion includes a pair of engaging portions disposed opposite one another on the holding apparatus, and the pair of elastic closed loop members engages with the pair of engaging portions.

14. (Previously Presented) The holding apparatus for the vitreous body surgical lens according to claim 13, wherein at least one or more engaging holes for engaging with the engaging portions of said holding portion for the vitreous body surgical contact lens are provided in the closed loop members having the ring shape.

15. (Previously Presented) The holding apparatus for the vitreous body surgical lens according to claim 18, wherein a substantially rectangular engaging hole is provided in the closed loop members having the ring shape.

16-17. (Canceled)

18. (Previously Presented) The holding apparatus for the vitreous body surgical lens according to claim 13, wherein the pair of elastic closed loop members are rubber members having a ring shape.

19-25. (Canceled)

26. (Previously Presented) The holding apparatus for holding the vitreous body surgical contact lens according to claim 18, wherein the rubber members are silicone rubber members.

27. (Canceled)
